

ACKNOWLEDGEMENTS

The original *Health and Safety Training for Early Childhood Providers* curriculum and handbook was the result of a combined effort on the part of many creative individuals working on an interagency committee to establish a statewide recognized health and safety training course designed for early childhood providers of all backgrounds. Special recognition is given to Torry Anderson R.N., B.S.N, past CISS/HSDCC Project Coordinator for the creative energy, collaboration and dedication invested in the original product. The original project was designed to meet continuing education requirements for a variety of programs.

This revised edition of *the Health and Safety Training for Early Childhood Providers-Revised 2002* and the accompanying revised Participant Handbook is the result of many months of research and collaboration with members of the Utah Healthy Child Care America Project Advisory Committee. In addition, many content experts volunteered countless hours to ensure the revised information was as accurate and up to date as possible. Special recognition goes to the following individuals:
